

The Pursuit of Excellence

The Thai Foam Group is one of Thailand's most successful business groups because it is constantly striving to improve its products and services for customers. In line with this pursuit of excellence, the Thai Foam Group has recently attained ISO 9001:2000 certification from TÜV.

This internationally-recognized management system will help to enhance performance through the continuous improvement of products and work processes. It will not only make the everyday running of the group more efficient, but should also benefit the Thai Foam Group's customers and suppliers.

ISO certification should also enable the group to play a greater role internationally, further enhancing Thailand's reputation as a source of quality manufacturing.

Four Decades of Quality and Excellence

Since its inception, the Thai Foam Group has grown into one of Thailand's most productive and respected business groups. Employing over 600 highly-skilled workers at six state-of-the-art factories all over the country, the group turns out a huge range of foam goods for many big-name companies. These companies use foam for packaging and insulation, as well as in many other products that are exported abroad or used in the domestic market. So the Thai Foam Group is not only contributing to the Thai economy, but is also helping to enhance the country's reputation internationally, as a centre for high-quality manufactured goods.

The group's products are made from several kinds of foam, including:

- Expandable Polystyrene (EPS)
- Expandable Polyethylene (EPE)
- Expandable Polypropylene (EPP)
- Expandable Polyethylene-Polyurethane Co Polymer (POCELAN)

These foams are used in a huge variety of products, such as:

ISO 9001:2008
are fulfilled.

The certificate is valid until 31 April 2013
Certificate Registration No. 9000 180 006
The company has been certified since 198

Message from Governor of IEAT

The attainment of an international certificate for business performance is an important
achievement for a company. The Industrial Estate Authority of Thailand recognizes the
great skill and effort required for such achievement. It is therefore a great pleasure to
show our appreciation to the Thai Foam Group as it achieves its ISO 9001:2008
certification.

Companies like the Thai Foam Group contribute a great deal towards the expansion of
Thailand and its industrial capabilities. Apart from setting its own standard of
production, the Company provides employment and generates income for the local Thai
economy, leading to better communities and greater national economic growth. In
addition, the Thai Foam Group has shown its concern about the environmental
protection as reflected by the use of EPS foam in the production line. With a unique
polymer product, EPS foam is easily recyclable and reusable. It also has genuine
greenhouse gases in storage for reuse later.

It is the policy of the Industrial Estate Authority of Thailand to promote industries in
harmony with economic sustainability and social growth. The Thai Foam Group
represents a particular kind that we hope to promote and assist with, in order to
bring sustainable development to Thailand. On the great occasion, we would like
to sincerely congratulate the management as well as all the staff of the Company for
the diligent pursuit. We'll have wishes to the Thai Foam Group, we hope to see the
Company continue to thrive and prosper in the future.

Mr. Natchan/Thawee
Governor
Industrial Estate Authority of Thailand
